

Kamari Pope

Full-Stack Developer

Los Angeles / New York · +1 (213) 870-9035 · kamaripope@gmail.com · [linkedin.com/in/kamari-pope](https://www.linkedin.com/in/kamari-pope) · [kamaripope.com](https://www.kamaripope.com)

Kamari is a full-stack developer with a strong foundation in JavaScript and TypeScript, and I have a growing proficiency in Python. He has experience building responsive web applications using React, Next.js, and Tailwind CSS, as well as developing backend systems with Node.js, Express, and PostgreSQL. He is comfortable working with APIs (REST and GraphQL), databases, and modern development tools like Git, Docker, and CI/CD workflows.

PROFESSIONAL EXPERIENCE

Software Optimizer / Analyst

October 2025 - Present

Somatrix Fintech Solutions, Los Angeles, CA

- Design and develop financial technology products from concept through implementation.
- Extract, clean, and analyze data from diverse financial sources to identify trends and generate actionable insights.
- Build forecasting models and automation tools to support data-driven decision-making.
- Develop and optimize algorithmic trading tools, including trading bots, to support market analysis and investment strategy.

IT Personnel

July 2025 - Present

Pacific Marine & Offshore Technology Group, Long Beach, CA

- Monitor and manage network systems to support daily technology operations.
- Design, maintain, and manage relational databases for organizational use.
- Provide technical support to on-site personnel, troubleshooting hardware, software, and connectivity issues.
- Assist with IT infrastructure maintenance, system updates, and internal technology coordination.

Full-Stack Web Developer

October 2024 - December 2025

California Agricultural Development Foundation, Sacramento, CA

- Collected and organized crop growth data from agricultural experiments to support internal reporting and research.
- Collaborated with a designer and project manager to design and develop a functional, user-friendly website.
- Used HTML, CSS, JavaScript, and jQuery to convert Figma designs into pixel-perfect, responsive web pages.
- Implemented semantic web technologies, including ARIA, HTML5, and Open Graph tags, to improve accessibility, SEO, and social sharing.
- Managed team communication through email and supported version control and collaboration using GitHub.
- Conducted post-production quality assurance testing, improving website performance by approximately 50%.

PROJECTS

Dionysus - AI Developer Collaboration Platform

- An AI enabled developer collaboration platform with Github Integration.
- Built entirely on Nodejs using Nextjs, React, Postgresql, Prisma, Typescript, and Tailwind.
- Used Langchain, Gemini AI and the Github API to build a bespoke Retrieval Augmented Development (RAG) Pipeline that facilitates content aware search in the codebase.
- Integrated Stripe to implement a credit-based payment system that charges credits per file on Github repository.
- Utilized tRPC for seamless end-to-end integration.
